

PROJECT 1: ECE 6140

For the four circuits:

s27.chat

s298f_2.chat

s344f_2.chat

s349f_2.chat

You are to develop a circuit simulator and test it with the following inputs for each circuit:

s27.chat

1110101

0001010

1010101

0110111

1010001

111110000011110001111111

111000011100011000000000

011110111100000001111111

Your report is to contain:

1. A one-page description of the data structures you used to implement your simulator (max)
2. A one-page description of your simulation algorithm in flow diagram form or pseudo-code.
3. For each circuit simulated, the inputs and outputs in vector form entered into a table (neatly)

Total size of report: 2 pages + simulation data above

Due date: Monday October 7th (all students)
